UPS Decommissioning and recycling

End-of-life management of your UPS by Socomec

appli_1133.eps

Socomec will support you in the replacement of your UPS. Upon request, we can take care of decommissioning your old equipment and transporting it to an approved recycling centre.* Thanks to this comprehensive service, you benefit from optimal business continuity and the responsible management of your end-of-life equipment. This turnkey solution frees you from all the constraints associated with decommissioning and recycling your UPS units.

Operational peace of mind
Socomec manages the entire end-of-life process for your equipment. From planning to collection and recycling, everything is taken care of to ensure a smooth and hassle-free service.

Turnkey solution
A comprehensive offer including planning, decommissioning, secure transport and handling at a dedicated recycling centre. No hidden costs: you benefit from a simple solution that is fully under control.

Regulatory compliance
Our approved partners apply all current legal requirements for the management of electrical and electronic waste. You benefit from compliant processing and a traceability certificate for complete peace of mind.

Sustainable commitment
Your equipment is recycled in certified channels, in line with our environmental commitments and those of our customers. A responsible approach that contributes to the ecological transition of your facilities.

Strong points

- All-inclusive package: from UPS decommissioning to recycling
- Operational continuity: synchronisation of UPS replacement with decommissioning of old equipment
- Guaranteed regulatory compliance: waste traceability certificate
- Certified recycling channels
